

Scanning online vs. Offline: What's the difference and why does it matter?

When internet connectivity is poor, as it can often be in college fair venues, choose 'offline' scan mode. This will allow you to make notes and rank the lead: important functions in your recruiting process!

When you scan in 'online' mode, you can see student data on screen. This is a great perk, but not critical in your recruiting process. We have ensured that you will sacrifice no functionality in your app when you are scanning without wifi or internet connectivity:

Scanning online, capture notes and rank leads. Student data is confirmed on screen:

Scanning offline, capture notes and rank leads. Barcode number is confirmed on screen.
